TO: Minerals File

FROM: Tom Munson, Senior Reclamation Specialist *TM*

RE: Site Inspection, Dale Rogers, Pitchfork Springs/Multicolor, S/027/033, Millard County, Utah

Date of Inspection: March 22 2001  
Time of Inspection: 10:00 a.m.  
Conditions: Sunny  
Participants: Larry Garahana, BLM; Tom Munson, DOGM

Purpose of Inspection: To visit the site while in response to receipt of BLM letter that site has exceeded five acre limitation of small mine.

The first area GPS'd was called One Yard. It was an off loading point for the stone at the lower end of his property. We next GPS'd the road going up to his disturbance and calculated as 14 feet wide. There are four culverts on the access road that comes up the BLM land. There is a small area that he will use for a pad where he can put some trailers. He will do some reseeding on the old road that he took out of the wash.

We next GPS'd the quarry area identified as quarry1. We walked down the road to the state lands that Dale had previously disturbed, which he said he will reclaim. We will include this area as part of the disturbance.

There is a small area off the quarry area that was originally counted in, which has partially revegetated. Dale will come in and reclaim this area. We then GPS'd another small disturbance adjacent to the quarry. We walked down the road that took us to the state land disturbance on the other side of the mountain. The GPS file for this small disturbance is R2 and the road going down the hill is R3.
